EDUCATION

Wilfrid Laurier University

BSc in Computer Science; GPA: 3.9/4.0

Milton, ON

Sep. 2024 – Present

Brampton Centennial Secondary School

High School Diploma

Brampton, ON

Sep. 2020 – Jun. 2024

PROJECTS

Flask Todo App | *Python, Flask, HTML, CSS, SQLite*

- Developed a full-stack web application using Flask and SQLite to manage a personal todo list
- Designed a clean, responsive frontend with HTML and CSS for an intuitive and user-friendly experience
- Implemented full CRUD functionality allowing users to create, update, complete, and delete tasks
- Structured the application using the MVC pattern to separate concerns and improve code maintainability

Trivia Game | *Java, Java Swing*

- Developed a desktop trivia game using Java Swing with a fully interactive graphical user interface
- Applied core object-oriented programming principles including encapsulation, inheritance, and polymorphism
- Designed multiple question categories with a dynamic scoring system to enhance the gameplay experience
- Implemented game state management to track player progress, score, and remaining questions per round
- Structured codebase with reusable and modular classes to allow easy addition of new trivia content

Housing Price Prediction | *Python, Jupyter Notebook, pandas, Matplotlib, scikit-learn*

- Built a machine learning model to predict housing prices using a real-world dataset with scikit-learn
- Performed data cleaning and feature engineering using pandas to prepare the dataset for modeling
- Visualized data distributions, feature correlations, and model performance metrics using Matplotlib
- Compared multiple regression algorithms including linear regression and random forest to identify the best model
- Evaluated model accuracy using metrics such as RMSE and R^2 score to validate prediction quality

Personal Website | *HTML, CSS | In Progress*

- Building a personal portfolio website from scratch using HTML and CSS to showcase projects and skills
- Designing a multi-section layout including an about page, project gallery, and contact form
- Focusing on responsive design principles to ensure a consistent experience across desktop and mobile devices

TECHNICAL SKILLS

Languages: Python, Java, C, HTML/CSS, SQL, JavaScript

Frameworks: Flask, React

Developer Tools: Git, Jupyter Notebook, VS Code, Visual Studio, Eclipse

Libraries: pandas, NumPy, Matplotlib, scikit-learn
